

SoilWin

Quiet comfort all around!

Empty three-dimensional hollow ceramic block with argon gas with the possibility of a modular connection as a facade and double-glazed window heat and sound insulation

Features

- Sound and heat insulation
- Fire proof
- Easy installation
- Production in different sizes, designs and colors
- High strength and impact resistance
- Has high hardness against scratches and scratches
- Resistance to temperature change

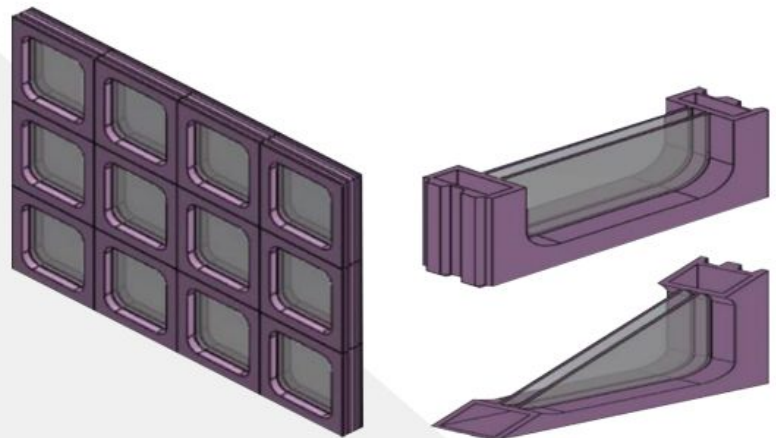

SoilWin

Innovative Points

- 1 The chemical structure insulates ceramics from impact, sound, and heat.
- 2 Injecting argon gas and keeping it inside three-dimensional ceramics for thermal and acoustic insulation.
- 3 Use a layer of glaze on the block and provide a two-stage baking cycle.
- 4 The lightness of this structure is due to the high thickness, and strength of the materials used.

Product Details

Height

48*48 inches

Weight

15 kg

Product life

Lifetime
